

Example: AER 形式

Shiro Takeda

\$Id: aer.tex,v 1.1 2006/04/22 09:30:54 st Exp \$

aer.bst を使った例。AER (American Economic Review) 形式の reference になります。

一緒に natbib.sty を使ってます。普通の経済学っぽい citation の形式になります。

Brander and Krugman (1983), Helpman and Krugman (1985), Baldwin and Krugman (1988), Helpman and Krugman (1989), Brezis, Krugman and Tsiddon (1993), Fujita, Krugman and Venables (1999), Krugman and Obstfeld (199?), Baldwin and Krugman (2000), Krugman and Obstfeld (2000),

一気に沢山 cite。同じ著者のならカンマで区切ってそのまま並べればよし。

Krugman (1979, 1980, 1981, 1984, 1987a,b, 1991a,b,c, 1993, 1996, 2000).

ちなみに、Reference で一番上にある Baldwin and Krugman (1988) が BibTeX のデータベースでどう登録されてるかというと、

```
@InCollection{baldwin88:_market_acces_inter_compet,
  author =      {Richard E. Baldwin and Paul R. Krugman},
  title =       {Market Access and International Competition: A
                 Simulation Study of {16K} Random Access Memories},
  booktitle =   {Empirical Methods for International Trade},
  publisher =   pu-MIT,
  year =        1988,
  editor =      {R. Feenstra},
  address =     ad-MIT
}
```

こんな感じになっています。このようにデータベースでは項目毎に箇条書きで登録しておくだけです。BibTeX はこれを自動的に Reference 部分のような複雑な形式に加工してくれるというわけです。
